

## Terrazzo 2

### Now for Windows NT/95!

Pave your way to glory. Symmetrical patterns and backgrounds add depth to any design, from textiles to print advertising to Web sites, and Terrazzo is the only tool that creates symmetrical tiled backgrounds quickly and easily. Create a tile from any image by selecting a tiling symmetry and then selecting an image area. Preview tiles on the fly as you move the selection. Feather the borders between tiles to create a seamless background. Customize the look of your patterns with precision controls. Terrazzo 2 received MacUser's four-mouse rating as well as New Media Magazine's Thumbs Up rating.

### Features

- The only tool that lets you create symmetrical tiled backgrounds instantly
- Fast and simple: create a tile from any image by choosing a tiling symmetry and then positioning it over part of an image.
- Preview tiles on the fly as you move the selection area over an image.
- Because you can use any part of any image as a source, Terrazzo gives you a limitless source of beautiful designs.
- Use in any project: Web sites, print design, textile patterns, texture maps for 3D rendering, or animation.

### System Requirements

Windows: Windows 95 or Windows NT 4.0 on any PC with a 486 or faster processor and a CD-ROM drive with a minimum of 16 MB RAM (24 recommended), a 16-bit graphics card (24-bit recommended), and 8 MB of free hard disk space.

Macintosh: 68020 or newer processor, color monitor, System 7 or newer software, and at least 1 MB of RAM more than required by the host application.
